

# TODDLER BOOKLIST

by Paula Burgon 4/11

Toddlers are a delight ... when occupied. Not only will reading to your toddler occupy time, but it will stimulate his or her intellectual development. Listening to the language of books while cuddled on your lap gives young children the ability to experience the world.

Choose books that present familiar ideas, easy concepts, simple stories with concrete action and recognizable characters. Toddlers will delight in rhythm and rhyme, humor, lullabies, and repetition. Their attention span is short, so choose stories that are simple. Illustrations that are bright are more inviting. It is important that the pictures are simple and not cluttered.

The following titles are perfect to cuddle up and share with your toddler. Many of these authors may have other books your toddler might enjoy. We also have a wonderful variety of toddler board books that are perfect for your toddler to experience.
