Coffee Filter Butterflies

Supplies:
- Coffee Filters
- Rubbing Alcohol
- Pipe Cleaners
- Clothespins
- Paint Brush
- Markers

1. Using markers, create a design on two coffee filters stacked together. Only put the design on the top filter.

2. Keeping the two filters together, dab rubbing alcohol all over the coffee filters.

3. Without separating the filters, allow to dry completely.
4. One the filters are dry, separate them.

5. Fold both coffee filters accordion-style and stack on top of each other.

6. Pinch them in the center and place a clothespin to hold them together (you may want to decorate the clothespin with markers).

7. Carefully unfold the filters to make the four wings of the butterfly.

8. Wrap a pipe cleaner around the back-side of the clothespin, if you would like to add antennae to the butterfly.
